CONDITIONS OF SALE.

First.—The highest bidder to be the buyer; and if any dispute arise between two or more bidders, the lot so in dispute shall be immediately put up again and resold, provided the auctioneer cannot decide the said dispute.

Second.—No person to advance less than 1s.; above five pounds 5s.; and so on in proportion.

Third.—All lots are put up for sale subject (*a*) to any reserve price imposed by the seller and (*b*) to the right of the seller to bid either personally or else by any one person who may be the Auctioneer.

Fourth.—The purchasers to give in their names and places of abode, and to pay down 5s. in the pound, or more in part of payment, or the whole of the purchase-money, *if required;* in default of which the lot or lots so purchased to be immediately put up again and resold.

Fifth.—Each lot is believed to be genuine, but should any lot prove to be a forgery, or reprint, or wrongly described in the catalogue, the purchaser is at liberty to take or reject it, provided always that notice of such rejection be made and the lot returned within seven days from date of sale.

Sixth.—The Auctioneers will not hold themselves responsible for any action that may arise, acting solely as agents between buyer and seller and for both equitably.

The Auctioneers will not hold themselves responsible for the safe custody of any lots left more than three days after the date of Sale.

Please Note.

The metal in which the coins are struck is indicated thus:—

AV = gold, *AR* = silver, *AE* = copper or bronze.

El = Electrum (an alloy of gold and silver).

Bl = Billon (an alloy of silver and copper).

Care is taken to describe accurately the condition of coins and medals, using the following scale: *Extremely fine, Very fine, Fine, and Good.* Where no condition is stated it may be assumed that the coins and medals are not in good condition.

FOREWORD

The collection offered for sale herewith is a very extensive collection which covers the whole field of Greek Numismatics, from Gaul, through the whole Greek world, and as far as Northern Africa. From this point of view, it will rank among the important collections, even if it cannot be compared for value, size and quality with such well-known and great collections as Pozzi, Bement, Spencer-Churchill, and many others.

If, however, the great rarities are missing, if there are no exceptional pieces, this cabinet is remarkable for the state of preservation of the coins in every series. It shows the great taste and the selective care with which the owner (who wishes to remain anonymous) gathered over many years what can be best described as *a representative collection of the Greek series.*

Since the War no such cabinet has come on the market for sale by public auction. On the contrary, many a collector has hitherto been unable to complete gaps in his collection because such pieces as he wanted have not been offered. This sale, therefore, will be of considerable attraction to all who are interested in Greek coins, surely the most beautiful of all series. The large number of coins will afford opportunities to the average private collector, whilst the more fortunate will also find many rare and attractive items.

Several sections deserve special mention because it is apparent that the owner specialised in them and gathered a large number of varieties, or collected as complete a series of reigning monarchs as possible. One would, for example, like to draw attention to the Syracusan and Athenian series, so representative of the evolution of the coinage in these two City-states; to the issues of Alexander the Great, whether of his lifetime or posthumous, comprising more than 30 lots; to the attractive portrait coins of the Seleucid (over 40 lots), Parthian (over 30 lots), and Egyptian (about 30 lots) Kingdoms; and, lastly, to the issues of Sassanian and Arab-Sassanian Kings and Rulers which are usually so neglected, but of which so large a selection is offered here.

If one were asked to select some of the most attractive single items, the following would doubtless be suggested: —

Lot

14 Stater of Philip II of Macedon.
18 Double Stater of Alexander III the Great.
42 Octodrachm of Queen Arsinoe II of Egypt.
108 Tetradrachm of Metapontum (Leukippos).
125 Distater of Thurium.
145 Stater of Croton (Apollo).
210 Tetradrachm of Syracuse by Artist K.
212 Dekadrachm of Syracuse by Kimon (or his pupil).
213 Dekadrachm of Syracuse by Euainetos.
296 Tetradrachm of Macedon Deuteras.
438 Stater of Elis-Olympia (Hera).
636 Tetradrachm of Mithradates II of Parthia.

One thing which might be regretted is that, though quite a few pieces come from well-known Continental auction sales of the period between the two World Wars, no pedigree is given, as the owner did not keep a record of their provenance.

Great care has been taken to describe each item as accurately as possible, and even in some cases, where this was possible, identity of dies with pieces from well-known collections is mentioned. This involved the use of many works of reference, a detailed list of which is given below. It was done so that this catalogue might not only be of some help to future work on any Greek State or City, but also a lasting monument to the keen interest for Greek Numismatics shown by its Noble owner.

PRICED CATALOGUES

of Coins and Medals

AFTER each sale these catalogues are issued with the prices realised printed in the margin opposite each lot, thus giving at a glance a reliable guide to values.

The final test of value must always be auction prices rather than the figures given in books of reference for changing times and fashions soon render the latter obsolete and misleading.

On the average we issue twelve Coin and Medal catalogues a year, some of which are usually of sales of important collections The **priced catalogues** are posted to subscribers as soon as ready, usually about a week after the date of sale and the subscription is . . . .
